CORE CAPABILITIES

- Overhead & underground distribution construction and maintenance
- Transmission line construction, reconductoring and maintenance
- Substation construction, upgrades and maintenance
- Distribution, transmission and substation inspections
- Storm restoration & mutual assistance response
- Civil underground construction: trenching, boring, conduit, vaults, foundations
- Underground residential & data center feeders
- Vacuum excavation: potholing, daylighting, slot trenching
- Environmental: vault dewatering, pressure washing & compliance
- Qualified Electrical Worker (QEW) personnel & crews
- Construction power: temporary power poles & service upgrades

TYPICAL CREW

4 person: Foreman, 2 Journeyman Linemen, Groundman. Cable Splicers added for underground and data centers.

EQUIPMENT

Bucket trucks, digger derricks, vacuum excavation truck, pickups and support equipment.

STORM RESPONSE

24/7 call-out: (951) 317-6134. Self-sufficient crews for local and mutual assistance events.

SERVICE AREA

California, Arizona and Nevada; storm restoration in all 50 states and overseas.

UTILITY EXPERIENCE

Our crews have worked on systems including SCE, PG&E, SDG&E, LADWP, SMUD, IID, APS, SRP, NV Energy, AEP, Duke Energy, Entergy, Oncor, Southern Company, FPL, Con Edison, National Grid and DTE.

DIFFERENTIATORS

- IBEW signatory contractor: skilled, safety-trained union labor
- Data center and utility underground experience
- Leadership with deep utility construction and safety experience
- Scalable crews for maintenance and storm response, with safety, quality and schedule reliability on every job
